## SUMMARY

Innovative Software Developer with more than a year of experience in workflow optimization and development. Strong background in Full-Stack development with experience across multiple teams and technologies.

## EXPERIENCE

### Software Developer

VanCronenburg

April 2025 - present, Ghent, East Flanders

- Developed a custom quotation tool by integrating ERP, optimizing the workflow to reduce quotation processing time and increasing monthly sales volume; utilized Node.js and javascript.

### Full-Stack Developer

Innomatix

May 2024 - September 2024, Lierde, East Flanders

- Transformed paper-based workflows into digital solutions, improving data retrieval speed for team and supporting data-driven decisions via dashboards designed with Node.js, React and Git version control.

### Web Developer

Freelance

2023 - 2024

- Developed full-stack websites for small businesses including server hosting, domain management, and maintenance.

## EDUCATION

### Economics and modern languages

Graduated 2021

### Applied Computer science

HOGENT · Ghent, East-Flanders · 2025

## CERTIFICATIONS

### Galactic Problem Solver

NASA Space Apps Challenge · 2025

- Combined real scientific data, web technologies, and interactive 3D visualization to demonstrate how software development can turn complex scientific models into accessible, data-driven tools for education, research, and decision-making.

### Mainframe Advanced

IBM · 2024

- Highlights practical experience with mainframe environments and tools like Zowe Explorer, JCL, and ISPF—demonstrating understanding of enterprise-scale systems, legacy integration, and problem-solving in complex computing infrastructures relevant to modern software development and DevOps.

### Java

HackerRank · 2023

- Demonstrates strong proficiency in Java programming, problem-solving, and algorithmic thinking—core skills for building efficient, reliable, and scalable software solutions.

## SKILLS

JavaScript (Node.js, React) - Vite, vue, knex

Python, HTML & CSS

RESTful APIs, SQL & Database Management

Java (Spring Boot, JPA, RESTful APIs, Design Patterns)

Git Version Control, ERP SAP, Agile methodologies (Jira)

C# (.NET)

---

## PROJECTS

---

### B2B Portal Frontend

Delaware · [github.com/Pirv3li/DelawareFrontend](https://github.com/Pirv3li/DelawareFrontend) · January 2024 - June 2024

- Integrated React with RESTful APIs to deliver a scalable multi-page frontend.

### B2B Portal Backend

Delaware · [github.com/Pirv3li/DelawareBackend](https://github.com/Pirv3li/DelawareBackend) · January 2024 - June 2024

- Developed a B2B portal for Delaware using Node.js, focusing on backend.

### Team Searching Website

[playsync-pkj0.onrender.com](https://playsync-pkj0.onrender.com) · September 2023 - December 2023

- Created a website using Node.js and React, allowing users to create or join teams.

### Splendor (Card Game)

[github.com/Pirv3li/Splendor](https://github.com/Pirv3li/Splendor) · January 2023 - June 2023

- Developed a card game fully using Java, contributing significantly to both backend and frontend.
